### **DETAILED ACTION**

#### Election/Restrictions

1. Applicant's election of Group I in the reply filed on May 26, 2006 is acknowledged.

Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 12-18 have been cancelled. Claims 1-11, 19, and 20 are addressed on the merits herein.

### **Drawings**

2. Figures 1-3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 1-11 are rejected under 35 U.S.C. 102(e) as being anticipated by WO 03/100901. The reference teaches a method wherein cathode and anode plates are arranged on one side of a

separator (201) and the apparatus is folded to form a battery. The plates (202, 203) may be

arranged in any appropriate order (see page 8, first paragraph) but specific embodiments of the

invention include positioning two plates of the same polarity adjacent each other (see Figs. 2a

and 2b). The electrode plates are made by a coating and trimming process (see page 10, last

paragraph) and are adhered to the separator by an adhesive. Regarding the recitations of "can

be" in claims 4, 10, and 11, these limitations are given little patentable weight because they are

not considered to be positive recitations.

## Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

6. Claims 19 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kraft et al (U.S. Patent 6,120,563).

The reference teaches a method of manufacturing a secondary battery comprising the steps of arranging negative electrode plates (16) on a face surface of a first separator (16) (see Fig. 2), arranging positive electrode plates (14) on a face surface of a second separator (16) such that there is one extra negative plate (18A), and successively folding the structure to create a wound battery configuration. As shown in Figure 2, the plates have gradually increasing space between them in the direction that the folding will proceed.

The reference does not expressly teach that the battery comprises one separator and that the separtor has a bent portion, as recited in claim 19.

However, the invention as a whole would have been obvious to one of ordinary skill in the art at the time the invention was made because the use of one separator, having a bent portion, in the battery of Kraft et al. instead of the two separators disclosed by the reference, would not substantively alter the method of making the battery nor the final battery produced. In general, the practice of integrating two separate elements is not considered to distinguish over a reference unless a new or unexpected result is produced. See MPEP 2144.04. In addition, the reference teaches at column 4, line 53 that "the separator sheets 16 are positioned on either side of the cathode and heat sealed or otherwise joined about their peripheries to completely envelope the cathode 14." As such, the reference contemplates the joining of the separators, thus further suggesting Applicant's claimed method.

#### Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jonathan Crepeau whose telephone number is (571) 272-1299. The examiner can normally be reached Monday-Friday from 9:30 AM - 6:00 PM EST.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Patrick Ryan, can be reached at (571) 272-1292. The phone number for the organization where this application or proceeding is assigned is (571) 272-1700. Documents may be faxed to the central fax server at (571) 273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
